Work Experience

AgnostAI (Software Engineering Intern — Hybrid) | [Link](#) | Jul 2026 - Present
Founding Full Stack Developer Bengaluru, India

- Shipped **20+ merged PRs** for an AI-agent observability platform across telemetry, conversation intelligence, dashboard UX, and Slack workflows.
- Built AI observability onboarding for **OpenTelemetry**, **LangChain TS**, and **Spectrum TS**, enabling developers to instrument agent conversations and inspect traces in AgnostAI.
- Implemented LLM-powered workflows using **OpenAI** for **Spotlight Ask streaming**, login summaries, chat translation, and 48-hour self-improvement suggestions.
- Revamped the analytics dashboard with **shadcn/Base UI** and delivered Slack reports, mentions, and weekly summaries for operational AI-agent insights.
- Tech $\Rightarrow$ **TypeScript, React, Go, OpenAI, LLM Workflows, OpenTelemetry, LangChain, Slack API, ClickHouse, shadcn/Base UI**

HackerRank (Software Engineering Intern — Hybrid) | [Link](#) | Jan 2026 - Jun 2026
Team Integrity - Desktop Application Bengaluru, India

- Developed OS-level detection mechanisms for unauthorized applications using native Windows and macOS APIs.
- Built a real-time crash reporting and investigation pipeline with **Sentry** for production debugging.
- Implemented native **C++** and **Swift** integrations to extend Electron with low-level platform capabilities.
- Reduced production crash rate from **7% to 0%** through memory leak analysis and performance optimization.
- Tech $\Rightarrow$ **Electron JS, Crash Reporting Core, Language Binding, NewRelic, Native Application, OS Level Optimization Across Architecture, profiling, memory leak detection**

Keizer Works (Software Engineering Intern — Remote) | [Link](#) | Jun 2025 - July 2025
Full Stack Developer Chandigarh, India

- Integrated **Hono JS** APIs with **RBAC-based** authorization, improving backend security and structure.
- Built and optimized real-time features using **Socket.IO**, including internal chat and live updates.
- Used **Redis Streams** for reliable, scalable, and fault-tolerant chat event processing.
- Worked on cloud infrastructure using **AWS** and **SST based deployments**.
- Tech $\Rightarrow$ **Hono JS, Tan-Stack Router, Query, AWS services, VPC, bun SST-based deployment, Socket-IO, Redis Streams, auth RBAC Authorization**

Google Summer Of Code'24,'25 Mentee (Open Source — Remote) | [Link](#) | May 2024 - Aug 2025
Open ELIS Global Minnesota/Wisconsin, Winona/Dodge County

- Migrated legacy MVC controllers to RESTful endpoints and rewrote all JSP pages to React, implementing dynamic rendering and resolving critical edge cases across admin, test management, and configuration modules
- Engineered complex form state management using Formik with Yup validation schemas; contributed 50K+ lines of code across 100+ commits to production codebase
- Tech $\Rightarrow$ **Spring Boot RESTful APIs, JSP to React Migration, Formik/Yup Validation, Dynamic Rendering, MVC Architecture & Edge Case Resolution**

Projects

ELBAVOL: Lovable and Other AI Landing Page Generator | [Link](#) | *Personal Project*

- Architected a Lovable-clone platform using Go microservices orchestrated with Kubernetes; implemented LangChain & LangGraph for AI-driven website generation from prompts, with Kafka pub/sub for inter-service communication and Dockerized pods for scalable deployment
- Tech $\Rightarrow$ **Kubernetes, LangChain, LangGraph, Programatically Orchestration using k8s API**

Contract For Difference (Simulating Trading Platform) | [Link](#) | *Personal Project*

- Created high-throughput trading simulation platform processing thousands of concurrent orders; deployed Kafka for event sourcing, Redis-cached order books for instant reads, and async/await for efficient resource utilization
- Tech $\Rightarrow$ **Distributed Architecture, klines-charts, Kafka, Queues, Pub/Sub, Redis Streams**

F8F: Workflow Management Application | [Link](#) | *Personal Project*

- Built n8n-clone workflow automation tool with LangGraph-powered agentic AI; implemented visual node editor with conditional logic, state management, and intelligent email automation using AI agents
- Tech $\Rightarrow$ **LangGraph, LangChain, Conditional Execution, Different types of workflow, React Flow, Worker Based Architecture**

DataSheet AI (Minimal Financial AI-based spreadsheet & PDF Generator) | [Link](#) | *Personal Project*

- Created intelligent CLI application with LLM-based conversational interface for real-time crypto/stock market analysis, automating financial data retrieval and multi-format report generation (Excel/PDF)
- Tech $\Rightarrow$ **Coin Geko API, Massive/Polygon API, Terminal UI, xlsx package, pdfJS**

Education

University Of Delhi (DU) South Campus, New Delhi

BS. (Hons.) Mathematics & Computing

July 2022 – July 2025

- Cumulative GPA : **6.28/10.0**
- Relevant Coursework: JavaScript, Applied PyPackages, Python, Jupiter Notebook, HTML-CSS-JS, Probability & Statistics, Maxima, Mathematica, LaTeX Language
